IXL Technical Requirements

Overview

All you need to get started is a computer, tablet, or phone with a connection to the Internet.

Computer Requirements

- Windows, Mac OS, or Chrome OS (including Chromebooks)
- An up-to-date version of Chrome, Firefox, Safari, or Edge
- 256 MB of installed RAM (at the minimum)
- Resolution of 1024X768 with 32-bit color depth

If you'd like to use any of the audio available on IXL, you'll need a sound card and speakers (or headphones). Some printable resources require a PDF viewer, which is most likely installed on your computer. If not, no problem. You can download Adobe Reader for free.

An Internet connection speed of at least 128Kbps is recommended. If you want to connect via a proxy device, it must obey the HTTP/1.1 protocol, including all caching and anti-caching directives.

Mobile Devices Supported

iPad & iPhone	All models, iOS 15.0 or higher
Android Tablets	Android 8.0 or higher
Android Phones	Android 8.0 or higher
Fire Tablets	7-inch screen or larger, Fire OS 7 or higher

To start practicing on IXL, please download one of our custom apps. IXL may also be accessed from any browser on your mobile device.
