

Hello Principals,

We are happy to announce the District is providing take-home devices for students that have an unmet need at home. Federal support for investing in public education technology infrastructure is expanding to include out-of-school learning devices and connectivity. In line with this evolution and changing student needs, we are moving to a new era of student device management.

School Benefits:

- Do not have to manage device in Remedy
- Device is not counted towards school's inventory
- School issued device can be collected and used as buffer

Student Benefits:

- Keep device until they graduate/leave the district
- Matriculate/transfer with student as long as their with LAUSD
- Receives a newer device that has LTE (mobile internet) capability built in

Parents may request a home use device for their students by submitting a request at device.lausd.net

Technicians are monitoring the portal and delivering devices weekly to school sites.

We suggest you engage students who are....

- Attending summer school
- Matriculating/transferring or;
- Switching grade level using iPads to a grade level using Chromebooks

Although students who receive an ECF Chromebook should return their school-issued device to your school, students may request to keep their school-issued device for safety concerns but it must remain on campus.

Thank you,
IT Asset Management
