

SENI / TSP Comments

- Each school year, systematically present to the PAC on the existence and purpose of the Student Equity Needs Index (SENI)/Targeted Student Population (TSP) school financial plans at each LAUSD school.
- Systematically inform the PAC each school year about the American Institutes for Research (AIR) studies, evaluations, and reports regarding the impact of SENI funds.
- Each school year, systematically present to the PAC on the Student Equity Needs Index (SENI) calculation and fund allocations to individual schools.
- Each school year, provide the PAC with the SENI/TSP amounts carried over per school from one year to the next.
- The Strategic Plan Budget Tracker was presented to the SENI Subcommittee, but finance staff confirmed that this system does not address the LCAP Goals or the Action Items, or the SENI/TSP LCAP Action Items.
- Routinely post all materials and presentations that are presented to all PAC subcommittees on the public-facing SFACE website.
- Systematically post all PAC Subcommittee meeting videos on SFACE's public website.

Student academic data and LCAP metrics

- Provide timely iReady test data, broken down by relevant student groups as well as totals, to all district-level parent committees well in advance of LCAP comment deadlines.
- Provide timely iReady test data to school parent committees, broken down by relevant student groups as well as totals for that school, well in advance of SPSA plan completion deadlines.
- Present each LCAP action metric to include the baseline measurement, target goal, and outcome for each school year. Include clear indicators to document whether each metric was met or not.
- Require Superintendent Carvalho to formally respond to the 2023-24 school year PAC motions, which were developed by PAC members as LCAP comments for the 2023-24 school year.
- We would like information about the new changes to technology-based instruction, since we know that LAUSD is running pilot programs implemented at certain schools. We want a list of all those projects. Since they do not provide us with timely information, the PAC committee cannot give an opinion on the said changes.

Parent involvement

- The parent involvement system has failed for many years; there is no two-way communication, even though it is written in the plans, in reality it is very difficult for parents in schools to obtain information from the central committees and they do not know that they exist.
- For many years, parents do not know what their rights are as equal partners in their children's education. The word PARENT has been removed from the policies and replaced with FAMILIES; this term is creating

exclusion as parents. Furthermore, the focus of SFACE and LAUSD has been on immigration rights, which are very important, but they have forgotten about parents' rights as equal partners, where an impact can be made on students academically, but this issue is not addressed in any LAUSD public meeting nor in any committee in a comprehensive manner.

- PAC membership is not taken into account when LAUSD makes changes to policies, and many times the SFACE office calls parents who do not know how the policies work to legitimize their actions, and the parent has no choice but to accept everything that this office wants to change because they are not trained and do not know what it is about, and the SFACE office chooses parents without the proper knowledge.
- We would like to know what kind of research the American Institutes for Research (AIR) will be contracted for in the coming years.
- At the school level, parents are not informed about the programs available at each school! We would like to request that there be a list at each school to inform students of all the different programs being offered. Schools should systematically inform all parents about the programs at the time of enrollment and should also post this information on each school's website.
- Parents should be able to navigate the Dashboard at the school level, at the local level, and at the individual school level, and these trainings should be provided systematically.
