

EXAMPLE ELEMENTARY SCHOOL

This Elementary School has a student body of 800 students. 100 of these students are absent for 1 day.

Question 1: Student body = _____

How much ADA would this school lose for that day?

Number of students absent = _____

ADA = \$29.70 per pupil /per day

Loss of \$ _____ per day

Question 2:

What if these same 100 students missed 1 week (5 days) of school?

Number of students absent = _____

ADA = \$29.70 per pupil /per day

Loss of \$ _____ per day
