## MENTAL HEALTH SERIES: EARLY CHILDHOOD AND THE DEVELOPING BRAIN

Did you know that 90% of a child's brain growth happens by age 5? The early years are a critical window of opportunity, shaping a child's ability to learn, think and thrive and early experiences — positive or negative — lay the foundation for our children's future. The second wave of adolescent brain development involves a rapid spurt where new connections between neurons form to facilitate brain communication, learning, and memory. To help us understand how we can support our children's healthy brain development, Ms. Liana Diaz and Ms. Meredith, Region South Mental Health Consultants, will be presenting this exciting topic. We invite you to come learn different ways to support your child's healthy brain development!
