

# SAP® Business Network, standard account

## Simplify your transactions, grow your connections

The free standard account for suppliers on SAP® Business Network is the fast and easy way to start transacting with your customers. A standard account allows you to participate in sourcing events, collaborate on contracts, and transact an unlimited number of documents such as purchase orders and invoices.

Join over six million companies using SAP Business Network to simplify their selling processes, improve customer experience, support their growth, and accelerate their transition to the digital age.

### Simplify

- Exchange electronic purchase orders, order confirmations, ship notices, service sheets, invoices, and more with your customers
- Improve control, workflow, and customer experience by publishing electronic catalogs
- Gain visibility when tracking the status of documents and payments
- Access your account anytime, anywhere, using the SAP Business Network Supplier app on your mobile device

### Customize

- Filter and curate your list of documents for easy access and follow-up
- Stay in control by tailoring email notifications and mobile alerts
- Enrich your company profile and customize notifications
- Create users with defined access and make the account fit your specific needs

### Grow

- Manage multiple customer relationships on a single account
- Find new opportunities – and help new customers find you – on SAP Business Network
- Participate in sourcing events and gain new business
- Strengthen existing customer relationships and grow new ones

### JOIN TODAY

The standard account is entirely free, regardless of the number of documents exchanged, and does not require change management, new IT equipment, or additional resources. You can create your account in just a few minutes on [supplier.ariba.com](https://supplier.ariba.com).

You'll also find robust documentation and learning content in our [Help Center](#).

### NEED MORE?

If you need more advanced capabilities, such as archiving, reporting capabilities or integration to your ERP, you can upgrade your account to an enterprise account. Simply use the link located at the top of your supplier account. Please note that fees may apply.
