		I. Solve equations and inequalities in one variable.	1, 2				
		J. Represent and solve equations and inequalities graphically.	1, 2	2			
1. Concepts and		K. Understand the concept of a function and use function notation.	1, 2	2			
Procedures		L. Interpret functions that arise in applications in terms of a context.	1, 2				
		M. Analyze functions using different representations.	1, 2, 3	3-4			
		N. Build a function that models a relationship between two quantities.	2				
		O. Define trigonometric ratios and solve problems involving right triangles.	1, 2	2	0 19-2		
	Supporting	P. Summarize, represent, and interpret data on a single count or measurement variable.	2	1-2			
	Cluster		1, 2	1]		
		B. Use properties of rational and irrational numbers.	1, 2				
		C. Reason quantitatively and use units to solve problems.	1, 2	1			

• For Claim 1, each student will receive at least 7 CAT items at DOK 2 or higher.

¹ DOK: Depth of Knowledge, consistent with the Smarter Balanced Content Specifications.

² The CAT algorithm will be configured to ensure the following:

[•] For Claim 3, each student will receive at least 2 CAT items at DOK 3 or higher.

[•] For combined Claims 2 and 4, each student will receive at least 2 CAT items at DOK 3 or higher.

Claim	Content Category Assessment Targets	DOK ^{1,2}	Items		Total Items	
				CAT	PT	Itellis
2. Problem Solving 4. Modeling and Data Analysis	Problem Solving (drawn across content domains)	A. Apply mathematics to solve well-posed problems arising in everyday life, society, and the workplace.	2, 3	2	1 1-3 1 1-3	8-10
		B. Select and use appropriate tools strategically. C. Interpret results in the context of a situation. D. Identify important quantities in a practical situation and map their relationships (e.g., using diagrams, two-way tables, graphs, flow charts, or formulas).	1, 2, 3	1		
	Data Analysis (drawn across content domains) E	A. Apply mathematics to solve problems arising in everyday life, society, and the workplace. D. Interpret results in the context of a situation.	2, 3	1		
		B. Construct, autonomously, chains of reasoning to justify mathematical models used, interpretations made, and solutions proposed for a complex problem. Analyze the adequacy of and make improvements to an existing model or develop a mathematical model of a real phenomenon.	2, 3, 4	1		
		C. State logical assumptions being used. F. Identify important quantities in a practical situation and map their relationships (e.g., using diagrams, two-way tables, graphs, flow charts, or formulas).	1, 2, 3	1		
		G. Identify, analyze, and synthesize relevant external resources to pose or solve problems.	3, 4	0		
3. Communicating Reasoning	Communicating Reasoning (drawn across content domains)	A. Test propositions or conjectures with specific examples. D. Use the technique of breaking an argument into cases.	2, 3	3	0-2	8-10
		 B. Construct, autonomously, chains of reasoning that will justify or refute propositions or conjectures. E. Distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in the argument—explain what it is. 	2, 3, 4	3	=	
		C. State logical assumptions being used. F. Base arguments on concrete referents such as objects, drawings, diagrams, and actions. G. At later grades, determine conditions under which an argument does and does not apply. (For example, area increases with perimeter for squares, but not for all plane figures.)	2, 3	2	-	

 $^{^{1}}$ DOK: Depth of Knowledge, consistent with the Smarter Balanced Content Specifications.

- For Claim 1, each student will receive at least 7 CAT items at DOK 2 or higher.
- For Claim 3, each student will receive at least 2 CAT items at DOK 3 or higher.
- For combined Claims 2 and 4, each student will receive at least 2 CAT items at DOK 3 or higher.

² The CAT algorithm will be configured to ensure the following:

Mathematics Summative Assessment Blueprint
